A local folder with 9 files for example and 4 of them start with the same prefix (Strategic Partnerships Follow Up 1.xlsx, Strategic Partnerships Follow Up 2.xlsx, Strategic Partnerships Follow Up 3.xlsx, Strategic Partnerships Follow Up.rar). Uploading the folder with Nuxeo Drive

A notification message appears, bottom of my screen mentionning a problem with a file :

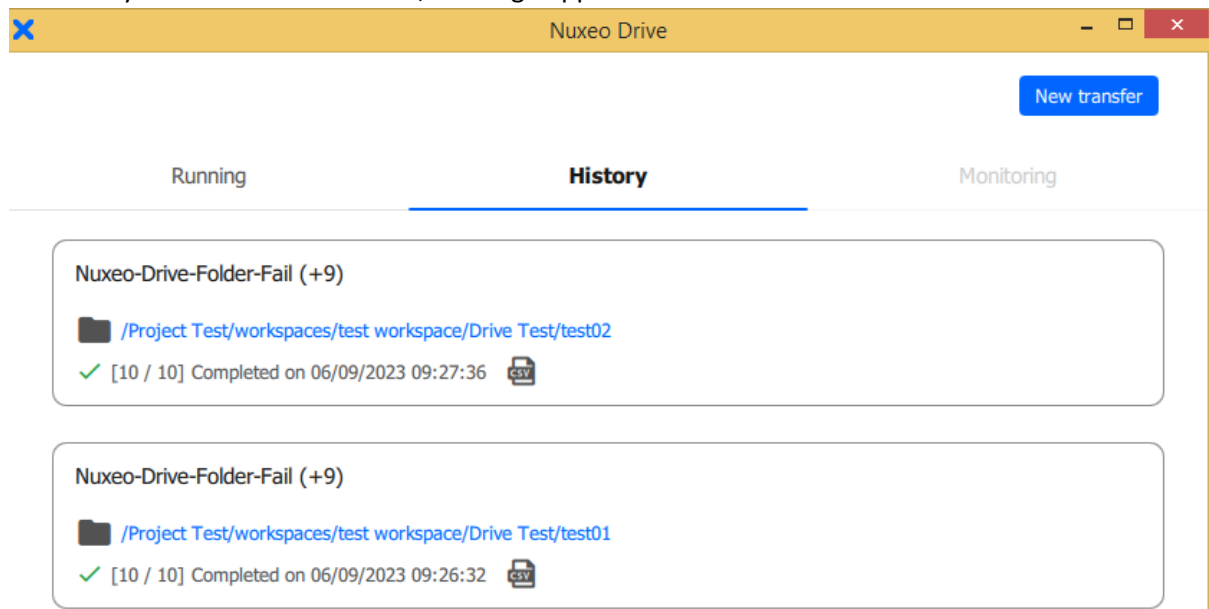

Checking the folder in Nuxeo, I have only 2 created documents out of 9 in my local folder. It can be 2, 3 or more documents, depends on tests. The problem is FondOCDMContact.png is correctly created on Nuxeo

On Nuxeo Drive, you can see The folder + 9 documents seems to be correctly created.

When I try to click on the CSV icon, nothing happened.

In Nuxeo Drive logs, I have this error :

```
2023-09-06 08:57:17 4272 10140 INFO     nxdrive.manager    Generating CSV file from
Direct Transfer session C:\Users\sguillaume.OCEANEDM\.nuxeo-drive\csv\session_2023-
09-06_06-56-53.csv.

2023-09-06 08:57:17 4272 10140 ERROR    nxdrive.manager    Asynchronous CSV
generation error

Traceback (most recent call last):

  File "nxdrive\manager.py", line 630, in _generate_csv_async

  File "nxdrive\session_csv.py", line 63, in store_data

TypeError: 'NoneType' object is not subscriptable
```

In Nuxeo logs, I have many errors regarding Concurrency, check the TXT log file
