

No session change after password change

Submitted by : Pradeep , 2/21/18, 6:31:41 PM

Bug Bounty [Connect](#) [Bug Bounty](#)

Vulnerability

Broken Authentication and Session Management

Severity Level

LOW [More...](#)

URL/Location

NA

Parameter

NA

Description

Whenever a user changes his/her password, the session id should be changed. This weak session id implementation leads to use the same session details by attacker to access the account.
